TIME DO FERRETTO

POLIEDROS

Poliedro Côncavo

Poliedro Convexo

aresta (A)

vértice (V)

face (F)

vale a relação:

$$V + F = A + 2$$

SOMA DOS ÂNGULOS
INTERNOS DAS FACES

$$Si = 360^\circ \cdot (V - 2)$$

EULER

SÃO 3
DIMENSÕES!

PIRÂMIDE REGULAR

POLIEDROS REGULARES

vai pelo nome!

		faces	vértices	arestas
	Tetraedro	4	4	6
	Hexaedro	6	8	12
	Octaedro	8	6	12
	Dodecaedro	12	20	30
	Icosaedro	20	12	30

ÁREA LATERAL

$$A_L = n \cdot \frac{a_B \cdot a_p}{2}$$

ÁREA TOTAL

$$A_T = A_L + A_B$$

VOLUME

$$V = \frac{A_B \cdot H}{3}$$

Os raios da circunferência inscrita (r) e circunscrita (R), podem te ajudar!

$$a_p^2 = H^2 + r^2$$

$$a_l^2 = H^2 + R^2$$

$$a_l^2 = \left(\frac{a_B}{2}\right)^2 + a_p^2$$

PRISMA REGULAR

ÁREA LATERAL

$$A_L = n \cdot a_B \cdot H$$

n° de faces laterais

ÁREA TOTAL

$$A_T = A_L + 2 \cdot A_B$$

Área da base

VOLUME

$$V = A_B \cdot H$$

No PRISMA
OBLÍQUO
 $a_l \neq H$

CUBO OU HEXAEDRO REGULAR

DIAGONAL

$$D = a\sqrt{3}$$

VOLUME

$$V = a^3$$

ÁREA TOTAL

$$A_T = 6a^2$$

PARALELEPÍPEDO RETÂNGULO

DIAGONAL

$$D = \sqrt{a^2 + b^2 + c^2}$$

VOLUME

$$V = a \cdot b \cdot c$$

ÁREA TOTAL

$$A_T = 2ab + 2bc + 2ac$$

SÓLIDOS DE REVOLUÇÃO

CONE

$$g^2 = H^2 + R^2$$

ÁREA LATERAL

$$A_L = \pi \cdot R \cdot g$$

Área do setor circular

ÁREA TOTAL

$$A_T = A_L + \pi \cdot R^2$$

Área da base

VOLUME

$$V = \frac{\pi \cdot R^2 \cdot H}{3}$$

ÁREA DA SECÇÃO MERIDIANA

$$A_{SM} = R \cdot H$$

CONE EQUILÁTERO

A secção meridiana é um triângulo equilátero.

$$g = 2R$$

CILINDRO

ÁREA LATERAL

$$A_L = 2 \cdot \pi \cdot R \cdot H$$

Área do retângulo

ÁREA TOTAL

$$A_T = A_L + 2 \cdot \pi \cdot R^2$$

Área da base e da tampa

VOLUME

$$V = \pi \cdot R^2 \cdot H$$

ÁREA DA SECÇÃO MERIDIANA

$$A_{SM} = 2 \cdot R \cdot H$$

CONE EQUILÁTERO

A secção meridiana é um quadrado.

$$H = 2R$$

ESFERA

ÁREA

$$A = 4 \cdot \pi \cdot R^2$$

VOLUME

$$V = \frac{4}{3} \cdot \pi \cdot R^3$$

SECÇÃO PLANA

É um círculo!

$$R^2 = d^2 + r^2$$

ÁREA DO FUSO ESFÉRICO

$$A_F = \frac{\pi \cdot R^2 \cdot \alpha}{90^\circ}$$

VOLUME DA CUNHA ESFÉRICA

$$V_C = \frac{\pi \cdot R^3 \cdot \alpha}{270^\circ}$$

Troncos de pirâmide ou cone

SÓLIDOS SEMELHANTES E TRONCOS

A secção do corte deve ser paralela a base!

RAZÕES DE SEMELHANÇA

$$\frac{a_B}{a_b} = \frac{a_L}{a_l} = \frac{H}{h} = \dots = K$$

Use as razões convenientes entre os segmentos da pirâmide ou do cone.

Área da base da pirâmide maior

$$\frac{A_B}{A_b} = \left(\frac{H}{h}\right)^2 = K^2$$

Área da base da pirâmide menor

Volume da pirâmide maior

$$\frac{V_{MAIOR}}{V_{menor}} = \left(\frac{a_L}{a_l}\right)^3 = K^3$$

Volume da pirâmide menor

Jamais use o tronco para montar as razões.

VOLUME DO TRONCO

$$V_{Tronco} = V_{MAIOR} - V_{menor}$$
